

Knex Transaction History

Knex Transaction History is an extension that can be used to archive company historical data and is designed to work seamlessly with Oracle Cloud Applications. Data from legacy or on-premise systems can be migrated to this cloud-based application and can be accessed for historical comparison, analysis or reporting if necessary. .

/ Features

> Secure & Cost Effective

Migrate historic transactions from past systems without costly conversion.

> Simple to Use Interface

Matches Oracle Cloud Applications user experience.

> Easy Access to Historical Data

Historical data can be used for comparison, analysis or reporting if necessary.

> Quick & Efficient Data Conversion

Eliminates costly data conversion of historic transactions during implementation.

> Compliant with Oracle's Best Practices

Follows the same compliance standards as Oracle of converting no more than three years of historic transactions

> Saves You Time

Reduces the the time needed for Oracle to perform Production to Test refreshes.

/ Integrations

> Oracle Procurement, Inventory, & Order Management

Archive data and still access long-term inventory trends without slowing you down.

> Oracle Projects

Focus on today's projects with an unburdened view on the past.

> Oracle Receivable, Payables, Fixed Assets, & General Ledger

Securely archive financial information and easily fulfill compliance needs.

> Oracle Contracts

Always have a contract on hand while keeping your system nimble.

Take the
Next Step.
