

Knex Shopping Cart

Knex Shopping Cart is an extension developed by Knex for our customers to easily use e-commerce capability, showcase, and sell products. It overlays shopping cart functionality for items in Oracle Inventory Cloud, seamlessly integrating credit card processors and shipping carriers. Orders checked out from the shopping cart are sent to Oracle Order Management for fulfillment.

/ Features

> Simple to Use Interface with Easy Navigation

Shopping is a pleasure with a simple-to-use interface, easy navigation, and advanced search capabilities.

> Quick and Efficient Checkout Process

Integrated inventory management and credit card processors make checkout straightforward.

> Merchant and Freight Carrier Integrations

Capable of being integrated to your merchants and carriers for real time credit card process and shipping updates.

> Order History Management

Customer information is securely stored for repeat business and monthly subscriptions.

/ Integrations

> Oracle Inventory

Consolidate disparate inventory tracking and control systems into a single, global inventory solution.

> Oracle Order Management

Accurately and efficiently manage customer orders across tailored, automated fulfillment processes.

> Oracle Autonomous Data Warehouse

Run a high-performance, highly available, and secure data warehouse while reducing administrative costs.

> Credit Card Processors

Seamlessly integrate credit card processing for secure, trackable, billable, and accountable transactions.

> Freight Carriers

Automatically package, ship, and track inventory through third-party carriers on a batched or placed-order basis.

Take the
Next Step.
