

Knex Grower Management

Knex Grower Management (KGM) seamlessly integrates with Oracle Cloud Applications, and offers a simplified approach for your all your Agribusiness needs. From maintaining grower contracts to executing production orders and harvesting entries by lot, KGM connects the missing links to streamline your daily operation.

/ Features

> Effectively Manage Contracts

Create/amend grower contracts to help with settlement.

> Farm Management Under One Roof

Easily manage nurseries, farms, and blocks to track harvest.

> Effortlessly Manage Harvest

Capture harvest estimates, create harvest orders, enter harvest receipts by lot.

> Efficiently Manage Compliance

Ensure compliance to expected quality, evaluate against specifications

> Promptly Manage Settlements

Track and net transactions, efficiently calculate final settlements.

> Intuitively Manage Finances

Automate nursery accounting, including revenue/COGS amortizations.

INDUSTRY / FARMING

/ Integrations

> Oracle Procurement

Integrated contract management, agreements, purchase order life cycle for growers.

> Oracle Manufacturing

Production and nursery orders translated to executable work orders.

> Oracle Inventory

Effective inventory management for produce, seeds, pesticides, fertilizers, and other raw materials.

> Oracle Quality

Ensure compliance by defining quality plans for grading steps and expected specifications.

> Oracle Cost Management

Track expenditure to correctly calculate cost of produce for farms and nurseries.

> Oracle Accounts Payable

Ensure prompt payments after netting and reconciling as part of grower settlement.

> Oracle Planning

Efficiently perform supply or demand planning for the production of crops and plants.

> Oracle Order Management

Integrated order fulfillment capability to send shipments to growers and nurseries as well as produce for distribution.
