

KNEX AI Agent Pack

KNEX AI Agent Pack for PeopleSoft brings embedded, agentic AI into core HR workflows, simplifying complex processes, improving employee self-service, and enhancing decision-making. Designed to work within existing PeopleSoft environments, it transforms traditionally rigid user experiences into intuitive, guided interactions.

/ Features

> Benefits Explanation Agent

- Clearly explains benefit plan eligibility, coverage, and costs using plan documents and configurations.
- Simplifies complex plan details into easy-to-understand responses.

> Payslip Explanation Agent

- Breaks down earnings, deductions, and tax changes in plain language.
- Helps employees understand pay fluctuations and payroll components.

> Leave Management Agent

- Projects future leave balances based on accrual rules.
- Helps employees plan time off with confidence and visibility.

/ Values

- > Simplifies complex HR processes through conversational AI
- > Improves employee experience and self-service
- > Reduces HR workload and repetitive inquiries
- > Enhances clarity, accuracy, and decision-making

/ Planned Roadmap

- > Benefits Plan Comparison / Enrollment Comparison Agent
- > Benefits Enrollment Assistant
